## APPLICATION FOR A STATE DISCHARGE PERMIT FOR AQUACULTURE FACILITIES

This form is for aquaculture facilities that discharge wastewater to State waters but, based on their production, do not require an NPDES discharge permit. No State discharge permit is required for discharges from crab shedding operations or flow-through operations of less than 10,000 gallons per day monthly average. Flow-through operations are operations conducted in ponds formed by the damming of natural watercourses. Questions call (410) 537-3323.
